

## Bluecoat PacketShaper Professional

**Duration: 3 Days**    **Course Code: BCPSP**

---

### Overview:

The Blue Coat PacketShaper course is the second level of training on the PacketShaper. This is the rebranded and modified version of the former Packeteer Advanced Traffic Analysis and troubleshooting (Level 2) course. The goal of this course is to help develop skills necessary to properly install, operate and configure PacketShaper. The course also aims to use reporting features and take appropriate action using PacketShaper control mechanisms to optimize network and application performance.

---

### Target Audience:

The course is oriented towards the learning needs of working IT network professionals responsible for troubleshooting network application performance using Blue Coat PacketShaper appliances.

---

### Objectives:

- The Blue Coat Certified PacketShaper Professional (BCPSP) course is intended for IT professionals who wish to develop and master the skills to properly install, operate and configure PacketShaper. It replaces the Packeteer Advanced Traffic Analysis and Troubleshooting (Level2) course. This course also covers how to use reporting features and take appropriate action using PacketShaper control mechanisms to optimize network and application performance.
  - Using PacketShaper tools to identify network problems and determine if PacketShaper can solve those problems
  - Configuring PacketShaper to fix network problems
  - After completing this course you will be proficient in:
  - Properly configuring different types of traffic trees
- 

### Prerequisites:

- Blue Coat Certified PacketShaper Administrator (BCPSA) certification, or waiver exam. Student should have practical experience with the PacketShaper appliance in the field with a solid understanding of networking and general knowledge of application behavior on Wide Area Networks.
-

## Content:

The Blue Coat Certified PacketShaper Professional (BCPSP) Course is intended for students who want to use new PacketShaper.features that deliver integrated visibility, control and compression capabilities in a single appliance. The BCPSP Course covers:

- Blue Coat PacketShaper Architecture
- Advanced Classification
- Advanced Bandwidth Management
- Understanding Adaptive Response
- PacketShaper Authentication
- Compression and Acceleration
- Introduction to IntelligenceCenter
- Introduction to Policy Center

---
